Abstract

A thousand things have to go right to have a great project, and this reality show will cover most of them. Here we will watch a user and practitioner PM jointly develop before your eyes, a Value Stream Map of a successful project. . .with plenty of editorial on what not to do. From project contract to "go-live," countless overlapping activities and communications have to take place with insane timing and precision. These two veterans will share their collective secrets from differing perspectives, all in 60 minutes.

Live Value Stream Mapping

Key Takeaways

- **Successful Implementations are a Partnership!**
- **Frequency Effects Perception**
 - MHE Providers deliver 100's of solutions every year
 - Customers typically undertake 1 or 2
- **Common Beginning and End**
 - Shortest distance is a straight line
 - Not separate varying paths

Questions

Material Handling & Logistics
