Abstract

Many supply chain veterans wish they had taken this class. For those contemplating their first exciting step into warehousing technology, or their 10th, this power panel will provide an overview of the key elements required to get off on the right foot, such as developing an effective team, data analysis, simulation modeling, and building a business case. Let these seasoned travelers help you get there faster and avoid the potholes.

Agenda

- **Panel Discussion**
- **Key Takeaways**
- **Questions**
