# Abstract

**What do we have to do to establish a stable and productive employee base as Supply Chain 2.0 is at the front door? Tenure is shrinking, technology is swelling, and who wants to pick cases for a living? This panel will discuss what the changing face of talent means to leaders and debate issues of succession planning, nurturing leaders, the power of intuitive solutions, the impact of automation, training, and more. If you are faced with developing resources in your organization, this discussion will light your way.**
